PROFILE

I'm Mazhar, a Senior Unity Developer based in Pune, India, with a diverse portfolio of successful games spanning multiple genres. Recognized for my deep expertise in Unity and C#, I've crafted innovative and engaging gaming experiences. During my tenure at GodSpeed Games, I spearheaded full-cycle game development projects, leading to the creation of popular titles like Snakes and Ladders [🔗](#), GodSpeed Cricket League [🔗](#), and Kitty Coloring [🔗](#) on Google Play. Known for my problem-solving prowess, I consistently overcome technical challenges to ensure smooth gameplay and user satisfaction. My experience mentoring junior developers demonstrate my leadership skills and dedication to fostering team growth. Driven by an unwavering passion for game development, I am always seeking opportunities to use my skills to create world-class games.

PROFESSIONAL EXPERIENCE

Senior Developer

Aptara [🔗](#)

Aug 2023 – present
Pune, India

Key Responsibilities:

- Led the development and deployment of XR Unity projects, ensuring scalable solutions that met project goals.
- Managed communication with US-based clients, understanding requirements, providing estimates, and handling project analysis and scoping.
- Worked closely with artists, designers, and developers to create visually engaging and interactive learning experiences.
- Conducted performance profiling and optimization to enhance platform performance and reduce load times.
- Established high code standards and best practices, leading code reviews to promote continuous improvement and team knowledge sharing.

Senior Programmer

GodSpeed Games [🔗](#)

Oct 2022 – May 2023
Pune, India

Key Responsibilities:

- Led the design, development, and testing of complex game projects, working closely with cross-functional teams from concept to completion.
- Leveraged Unity and C# to engineer intricate game mechanics, user interfaces, and other game elements.
- Coordinated with artists, designers, and QA teams to ensure a cohesive workflow and high-quality final products.
- Identified, diagnosed, and resolved complex gameplay bugs and performance issues, further optimizing user experience and game performance.
- Mentored and guided other team members, fostering a supportive and productive environment and helping them navigate advanced technical challenges.

Key Projects:

Snakes & Ladders [🔗](#) : As a key member of the development team, I made significant contributions to the creation of an immersive, digital version of this classic board game. My work in programming advanced game mechanics and resolving performance issues contributed to the game's success on Google Play.

Associate Senior Programmer

GodSpeed Games [🔗](#)

Aug 2021 – Oct 2022
India

Key Responsibilities:

- Played a pivotal role in the development lifecycle of game projects, contributing to everything from initial concept to final deployment.

- Utilized Unity and C# to engineer advanced game mechanics, complex UIs, and other interactive game elements.
- Engaged closely with other team members, including artists, designers, and QA teams, to ensure synchronized workflow and cohesive final products.
- Diagnosed and resolved a wide range of gameplay bugs and performance issues, helping optimize both user experience and game performance.
- Assisted in the professional growth of junior developers, offering guidance and support to help them overcome technical hurdles.

Key Projects:

Kitty Coloring Book for Kids [🔗](#) : Contributed to the development of a highly engaging drawing and coloring game for children, available on Google Play. The game features interactive elements designed to entertain and educate its young audience.

Plan B From Outer Space [🔗](#) : Played a significant role in the development and Nintendo Switch port of this comedic adventure game. Specifically, my contributions involved implementing the controller functionality using the Rewired plugin.

Programmer Level 2

GodSpeed Games [🔗](#)

Aug 2020 – Aug 2021
India

Key Responsibilities:

- Took on greater responsibilities in the full-cycle development of gaming projects, including conceptual development, planning, coding, testing, and deployment.
- Developed intricate game mechanics and user interfaces using Unity and C#.
- Collaborated with artists, designers, and QA teams to create interactive, engaging, and kid-friendly gaming experiences.
- Troubleshooted and resolved bugs and performance issues, ensuring smooth gameplay and user satisfaction.

Key Projects:

Coloring Games for Kids [🔗](#) : Participated in the creation of another drawing and coloring game targeting children, focusing on providing a wide range of creative options and promoting fine motor skills development.

Super Climber (Prototype) [🔗](#) : Led the development of this casual rock climbing game prototype. Utilized Unity to design immersive climbing mechanics, creating a unique and engaging gameplay experience.

Polishing Game (Prototype) [🔗](#) : Created a distinctive casual game prototype focused on the satisfying experience of cleaning and polishing objects. Leveraged Unity to develop interactive elements and the tactile cleaning mechanic.

Junior Programmer

GodSpeed Games [🔗](#)

Aug 2019 – Aug 2020
Pune, India

Key Responsibilities:

- Assisted in the full-cycle development of gaming projects, including concept development, planning, coding, testing, and deployment.
- Developed and debugged game code using Unity and C#.
- Worked closely with artists, designers, and QA teams to create seamless, high-quality gaming experiences.
- Troubleshooted and resolved bugs and performance issues to ensure smooth gameplay across multiple platforms.

Key Projects:

GodSpeed Cricket League [🔗](#) : Played a significant role in the development of a popular cricket game, available on Google Play. The game has been highly rated by users for its engaging gameplay and high-quality graphics.

Unity Developer

Ethosh Designs [🔗](#)

Jun 2017 – Feb 2018
Pune, India

Key Responsibilities:

- Assisted in the development of VR/AR applications using Unity and C#.
- Collaborated with a multidisciplinary team of artists, designers, and developers to create realistic and immersive VR/AR environments.
- Participated in the testing and debugging process to ensure the performance and user experience of the applications.

- Contributed to the resolution of technical issues related to VR/AR application development and optimization.

Key Projects:

Navy Ship Training [🔗](#) : Assisted in the development of a VR application designed to provide realistic training for naval ship operations. The project provided an immersive and safe environment for trainees to gain practical experience.

Safety Training [🔗](#) : Participated in the creation of an AR safety training application, offering users an engaging way to learn and practice safety procedures. This innovative application promoted effective learning through interactive elements.
